

Class 1 Home learning 28th February 2025

Home learning tasks:

We have had a very productive first week back. We have begun reading and learning an alternative version of Little Red Riding Hood which made the children laugh. We will be making changes to the story and thinking of other clever plans for LRRH to defeat the wolf and save Granny.

In maths, we are starting to look at what multiplication means and how these can be represented and solved using methods such as repeated addition and arrays.

I have to say well done to all of the children who have been practising their reading at home, this is making a huge difference, not only to their reading ability and comprehension but also to their confidence.

Reading.

Year 1

Your child will be bringing home a book this week which they read with you and also during guided reading, the aim is that this book is read multiple times to practise their phonics and fluency. They can also bring home a picture book to share. Please aim to read with you child 3 times a week and sign their reading records.

Year 2. Your child now has an Accelerated reader book. They will keep this book and read it both at home and in 1-1 reading until they can read it fluently. They will also have guided reading sessions in class with Mrs Mitchell using an additional Accelerated reader book.

***** For all children: regular reading and signing of the reading record by an adult earns your child a reward. If they read 10 times with their book signed, they get a sticker; 5 stickers and they get a reading prize! *****

NEW Projects:

The making one!

We have been learning all about different foods and where our foods come from. Can you design a healthy, balanced meal for dinner at home, help to make it then send in an image of what you have made to share and celebrate with the class.

The English one.

There are lots of fairy tales that have been shared over the years. Pick your favourite then using the book template (given out on TUESDAY 4th) can you

write the story for yourself. There is space for drawings on each page as well as the writing.

Try your best and remember what your writing NEEDS - capital letters, full stops and finger spaces and what it has to DO -make sense.

The 'If you have a computer' one.

In computing, we have been learning how to create pictures (we use sketchpad) such as rockets including inserting shapes, filing the shapes with colour and adding labels.

Can you make a picture at home on the computer. I don't mind what the picture is of, it could be an animal, new fairy tale character or just something from your imagination. I would like you to practice the skills you have learnt in class then bring (or send) the pictures in to show and celebrate.
