

Class 1 Home learning 21st March 2025

Home learning tasks:

A big shout out to all the children completing and bringing in their home learning. There has been such an interesting range of computer generated pictures from robots to fairies with heart shaped wings as well as some delicious-looking, healthy dinners like creamy chicken and potatoes to yummy sponge covered in fruit and squirty cream. These have all been shared and celebrated in class. Keep up the great work.

The children have begun some brand new learning in maths this week as we have moved on from multiplication to looking at its inverse – division. We will be working our way through a range of strategies to solve division calculations such as sharing and grouping for Year 1 and 2 moving towards use of a number line for the Year 2's.

Reading.

Year 1

Your child will be bringing home a book this week which they read with you and also during guided reading, the aim is that this book is read multiple times to practise their phonics and fluency. They can also bring home a picture book to share. Please aim to read with you child 3 times a week and sign their reading records.

Year 2. Your child now has an Accelerated reader book. They will keep this book and read it both at home and in 1-1 reading until they can read it fluently. They will also have guided reading sessions in class with Mrs Mitchell using an additional Accelerated reader book.

***** For all children: regular reading and signing of the reading record by an adult earns your child a reward. If they read 10 times with their book signed, they get a sticker; 5 stickers and they get a reading prize! *****

NEW Projects:

The making one!

We have been learning all about different foods and where our foods come from. Can you design a healthy, balanced meal for dinner at home, help to make it then send in an image of what you have made to share and celebrate with the class.

The English one.

There are lots of fairy tales that have been shared over the years. Pick your favourite then using the book template (given out on TUESDAY 4th) can you

write the story for yourself. There is space for drawings on each page as well as the writing.

Try your best and remember what your writing NEEDS - capital letters, full stops and finger spaces and what it has to DO -make sense.

The 'If you have a computer' one.

In computing, we have been learning how to create pictures (we use sketchpad) such as rockets including inserting shapes, filing the shapes with colour and adding labels.

Can you make a picture at home on the computer. I don't mind what the picture is of, it could be an animal, new fairy tale character or just something from your imagination. I would like you to practice the skills you have learnt in class then bring (or send) the pictures in to show and celebrate.
