Friday	Choir	KS2		Lunchtime	Free	28.04.23 Children to sign up in school	Miss Rushworth	

Bookings via School Money will open later in the week.

Stemineering Club

We are delighted to be running a LEGO Engineering after school club at your school. Our sessions are inclusive and enriching; inviting children to unleash their imaginations and developing engineering skills on our LEGO® bricks. Nick leads the sessions with a theme or concept and gently guides and encourages participants to problem solve, design, create, fix, and enjoy building!

The sessions include activities such as making LEGO® zip-lines, designing elastic band powered cars, building windmills that power a light, bridge and tower construction challenges, creating kinetic sculptures, exploring perpetual motion, and so much more...

Nick is a qualified and experienced vehicle engineer, working for Audi for over a decade, and continuing to use his engineering skills in vehicle and engine repair today, alongside his work with Stemineering with Nick. He has many years of experience teaching and facilitating activities for children and young people, as well as being a father to 3 children from 8 months to 13 years old.

Nick is passionate about accessible and enjoyable education, and he wants to inspire and support everyone in their learning journeys at whatever age, stage and ability they are at.

All our LEGO Sense sessions aim to not only develop creative engineering skills, but to also build self-esteem, confidence, and communication skills, and boost mental well-being. Our approach is child led, and one that facilitates creative learning and fun, rather than prescriptive ideas. We believe that every child can benefit from the time and space to create freely, especially with nurturing guidance and a safe environment. And this after school club will give your children exactly that!

The club will be on Thursdays from 3.30-4.30pm. The cost is **£31.50 for a 6 week** half term block. (Please note, childcare vouchers cannot be used).

Please book via School Money.

Payment information will be sent once a place in the club has been confirmed by school.
