

## **28/2/24   Class 3 Home Learning**

In English we have been using speech to convey character and advance the action using different clips from Harry Potter. We have now started planning our final extract of a story, thinking about what we want to show about each of the character and ambitious vocabulary that we could use within our story.

In Maths we have using known facts about angles to calculate the size of unknown angles as well as measuring and naming different parts of a circle. We now know what the radius, circumference and diameter is and have learnt that the diameter is half the radius.

In science, we looked at light and how it travels in straight lines. We bounced the light from a torch off different mirrors to get it to reach a target.

### **Home Learning**

#### **Reading**

We expect the children to read 5 times a week. It would be great for children to read to an adult as well as to themselves. It would help the children to be able to discuss the book they are reading with an adult as well for the adult to ask them questions about what is happening in their story.

#### **Maths**

Please ensure the children are regularly practising their times tables using times table rockstars – the times tables they need to practise have been assigned to them.

<https://trockstars.com>

This week, there is a mymaths activity for you to complete:

<https://www.mymaths.co.uk/>

#### **History**

Please refer to the homework set on 21.2.24 for the list of tasks to choose from for this half term. You should complete **2 of these tasks** before the Easter holidays.

Spellings will not be tested in isolation. We will be looking to see if the children are using them accurately in their writing.
