

23/05/23
Class 2

In English, the children have been exploring alliteration. They created sentences about images being creative with their alliteration.

In maths, we are using inverse to check calculations and estimating answers using rounding. The children have enjoyed solving a variety of addition and subtractions.

In Art, children have been exploring shading and colours. They created a range of shades of brown and green by using black and white paint.

Home Learning

*To celebrate and encourage reading of different texts, we are holding a sponsored read to raise money to purchase some up to date newly released children's books for each class. These will be books that the children can choose to read themselves either in school or to bring home to read. Your child will bring home a reading challenge and sponsor form before the half term holiday. **There will be 3 weeks to complete the challenge before sponsor forms are collected in on Monday 12th June.** The teachers will talk to the children about this.*

Both projects extended over the half term: New due date 7.6.23

Project 1: research a biome of your choice and create a diorama or A3 poster.

Project 2: complete a sound survey recording different sounds you hear in different locations
