F2 LEARNING – KNOWLEDGE ORGANISER

-Our world is a planet called <u>Earth</u>. It is one of a number of planets that go around the <u>Sun</u>. -This system of the Sun and planets is called the <u>Solar System</u>.

## **Key Vocabulary and Facts**

Sun	A huge star that Earth and
Jun	the other planets in our solar
	system orbit around.
Moon	A rock that orbits Earth/ other
	planets.
Crater	A hole in the ground caused
	by an explosion or the impact.
Asteroid	Asteroids are like mini planets
	that are made of material
	like rock.
Planet	A 'sphere' object that orbits a
	star.

In Science, we look at the world around us. Scientists try to find out how and why things happen.

- Scientists learn about their subject by <u>observing</u> (looking at things) and <u>experimenting</u> (testing things).

Early Science learning is found in the following EYFS areas of learning:

- -Understanding the World
- -Expressive Arts and Design
- -Physical Development

Learning about space –Sparks Imagination and Ignites Curiosity– It is all about the unknown, the 'what ifs?' and the fascinating questions. It helps children become creative thinkers, to challenge current theories and to question. Aiming High– Learning about space is about inspiring the next generation of astronomers, and helping them to have high expectations of themselves and of their futures.

SPACE

## The 8 Planets in our solar system

## Help your child by teaching them the importance of looking after their planet.

Help them to realise how fragile our own planet is and the message of the importance of looking after planet Earth. Whether it be through recycling, protecting our wildlife or reducing pollution- children can start from an early age to contribute to making a difference; establishing it as an integral part of their lifestyle.

## Key Questions:

Can I tell you on which planet I live and features of my immediate environment?

Can I share some facts about the different planets? (For example, Mars is red and rocky)

Can I explore what a star is and a constellation?

Can I investigate what a crater is and how it is made?

Can I explore what an 'Alien' is and create my own?
